STRAPS

FIND A STRAP THAT MATCHES YOU!

On the back of each Gowatch, you can find the reference number corresponding to the family of product. It always starts with T, and is followed by 6 to 13 numbers.

To find a compatible strap, enter the reference in the search field above. The website will display all compatible straps.

Change your watch's style or simply make it your own by changing the strap. Gowatch has created watches with easily interchangeable strap systems so that you can make them unique.

TEXTILE

The textile strap is a practical and stylish accessory that can effortlessly withstand extreme circumstances while still looking good. A straightforward design uses a strong fabric and stainless steel buckle for a no-frills look, while a range of colors means wearers can choose the color that best reflects their personality.
